

Disposing of Community Waste

Solid Waste Department / Land Fill / Household Hazardous Materials

The County recycles, converts waste to energy for electricity, converts land fill gas to energy and buries remaining materials according to the most advanced techniques available. La Crosse has one of the most advanced systems in the state, handling over 150,000 tons of waste per year. Scale Attendant Shelly Schulze performs a landfill load inspection for banned materials, Paul Schwartz, Operations Technician, checks out the gas to energy system equipment, Hazardous Waste Technician Greg Smith and Helper Melisa Goergen unloading hazardous materials.

Servant Leadership is our business.
